## COLLEGE OF DENTISTRY

## BUILDING AND EQUIPMENT

## LOCATION

THE College of Dentistry of the University of Illinois is located in what is known as "the clinical center of Chicago." It is at Harrison and Honore streets, directly opposite the Cook County Hospital. Adjoining it on the north is the University of Illinois College of Medicine, and on the west the West Side Hospital. Within a radius of a few blocks are a majority of the great metropolitan hospitals and professional colleges and schools. It is about a fifteen minutes' ride from the Union Loop, or down-town district, by either the Garfield Park branch of the Metropolitan elevated line, or the Harrison Street surface cars.

## THE COLLEGE BUILDING

The college occupies a separate five-story building, with a frontage of 100 feet on Harrison Street and 100 feet on Honore Street. The entering student registers in the business office, which is on the first floor of the Medical building. The building has ample space for laboratories, operating rooms for the several clinics, amphitheaters for general assemblies, classes, and student activities, recitation rooms, and rest-rooms for women and for men. Its equipment is of modern, scientific type. In addition to the accommodations in the main college building, many of the facilities of the University College of Medicine are available to students of dentistry, as the colleges are allied. For example, the chemical laboratory for both institutions is in the Medical building, while the laboratory of gross anatomy is in the College of Dentistry. The two faculties also are associated.

## INFIRMARY

A large part of the senior course is devoted to practical dentistry, and for this purpose an Infirmary is provided, which occupies the entire top floor of the main building. There are always more applicants for dental service than can be accommodated. The Infirmary is supplied with modern accessories, and there are windows on three sides, as well as skylights overhead, so that all work may be done by daylight. Adjoining the Infirmary are the superintendent's examination room and the therapeutic laboratory. All sterilization and preparation for therapeutic and root canal work is supervised by a registered nurse.

## LIBRARY

The general library of the University of Illinois in Chicago is in the Medical building, which adjoins the College of Dentistry. In this library there are over 20,000 volumes, including a comprehensive collection of works on dental and allied subjects. All of the standard dental journals are kept on file, and there is a representative collection of works in literature, standard and modern, for the exclusive use of English classes in the College of Dentistry. The library, in charge of a librarian and assistant, is open from 9 a. m. to 5 p. m., and room is provided for students desirous of employing their study periods in the library.

## ADMISSION AND GRADUATION

### REQUIREMENTS FOR ADMISSION

An applicant for admission to the College of Dentistry must be at least 17 years of age. Women are admitted on the same terms as men.

#### High-School Graduation

A candidate for admission *by certificate* must be a *graduate* of an accredited high school or other accredited school, with fifteen units in acceptable subjects. By acceptable subjects are meant the subjects included in Lists A, B, and C, below; not more than three units may be chosen from List C.

An applicant *who has not been graduated* from an accredited school must pass entrance examinations in the following subjects, amounting to 5 units:

English composition .....	1 unit*
Algebra .....	1 unit
Additional subjects to be designated by the University authorities.....	3 units

Total..... 5 units

The remaining 10 units necessary to make up the 15 units required for admission may also be made in entrance examinations or may be offered by certificate from an accredited school.

#### Prescribed Subjects

The fifteen units required for the College of Dentistry must include the following prescribed subjects (known as List A):

##### List A

English .....	3 units*
Algebra .....	1 unit
Plane geometry .....	1 unit
Physics, with laboratory work.....	1 unit

Total..... 6 units

#### Electives

In addition to the six prescribed units (List A), six units of electives must be chosen from List B below, and three more units from either List B or List C, to make up the total of fifteen units required.

##### List B

		<i>Units</i>
Latin .....	36 to 144 weeks	1—4
Greek .....	36 to 108 weeks	1—3
French .....	36 to 144 weeks	1—4

---

\*A unit is the amount of work represented by the pursuit of one high-school subject, with the equivalent of five forty-minute recitations a week, through 86 weeks; or, in other words, the work of 180 recitation periods of forty minutes each, or the equivalent in laboratory or other practice.

## REQUIREMENTS FOR GRADUATION

The degree of Doctor of Dental Surgery will be conferred on students who have completed the curriculum, attended the required time, and passed satisfactorily the final examinations. To be eligible to the degree, the student must be twenty-one years of age, must possess a good moral character, and must have paid all fees.

The monthly report of attendance, and the standing of students in recitations, laboratory work, and infirmary practise, both operative and prosthetic, are considered in making up the rating of final examinations.

## GRADUATION WITH THESIS

Students may become candidates for thesis honors through meritorious work. "Graduation with Thesis" is awarded on the presentation of a satisfactory scientific essay.

## HONORARY RESEARCH ASSISTANTS

Students may, during the last year of their course, be permitted to pursue advanced work in a department, provided, first, that they have shown special aptitude along this line; and, second, that their previous work has been of a sufficiently high grade. If at the end of the last year's work the student's application and attainment are regarded as of a sufficiently high character, an honorary research assistantship may be awarded.

## LICENSE FOR PRACTISE IN ENGLAND

On the recommendation of the Board of Examiners in Dental Surgery, the Council of the Royal College of Surgeons, in London, has added the College of Dentistry of the University of Illinois to the list of dental schools recognized by the College. This recognition implies that the Royal College of Surgeons will exempt graduates in dental surgery of the University of Illinois from the Preliminary Science Examination for the License in Dental Surgery, and will accept such parts of the curriculum for the License as are completed in the College of Dentistry of the University of Illinois toward the curriculum of studies required for a license.
